REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record do not teach or suggest, in the claimed combination there of, an inductive miniature component, comprising: a winding element of ferrite material embodied as an essentially flat, multi-sided part, wherein three windings are disposed on the winding element such that axes of the windings extend in three spatial directions that are respectively perpendicular to one another, wherein a first winding and a second winding are wound around the winding element, over a length and width thereof, in two directions that are perpendicular to one another in a central plane of the winding element, wherein a third winding is wound around a narrow side of the winding element following the periphery of the winding element; first guide elements disposed on an underside of the winding element for guiding one side of the third winding, wherein ends of the first and second windings are wound around respective ones of the first guide elements; second guide elements disposed on an upper side of the winding element for guiding another side of the third winding, wherein the second guide elements are made of ferrite material and are monolithic with the winding elements; a coil plate of electrically non-conducting, non-ferromagnetic material, wherein the winding element and the coil plate are placed together and interconnected, wherein the coil plate is provided with recesses that extend over a thickness of the coil plate, wherein the recesses have an inner contour and Application/Control Number: 10/578,793

Art Unit: 2832

arrangement that corresponds to an outer contour and arrangement of the first guide elements, and wherein the winding element and the coil plate are placed together such that the first guide elements engage into the recesses; and corners or projections provided on the coil plate, wherein ends of the third winding are respectively wound around the corners or projections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUYEN T. NGUYEN whose telephone number is 571-272-1996. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, ELVIN ENAD can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
